What If Scenarios

Q: I want to change my major. How can I see what would be required if I made this change?
A: DegreeWorks has a "What-If" option that allows students to preview major requirements for other programs easily and without changing your current curriculum. Students can see what courses are needed if a major or minor is changed.

The link to the What-If function is located on the left side of the student's audit. When using the What-If function, please be sure to select a Degree, Catalog term and College. Also, What-If audits do not guarantee that you will be accepted into the program or major. All curricular changes require approval. Contact your advisor for information and instructions.

Q: Can my advisor see my What-If scenario?
A: What-if scenarios are not stored. To discuss with your advisor, students can either work through a What If procedure with their advisor, or print a copy to show your advisor.
