

# MAJOR G.P.A. CALCULATOR

**Step 1:** Obtain a copy of your current advising transcript via FoxLink.

**Step 2:** List all courses completed with a letter grade for your major. Indicate the Letter Grade, Number Grade (numerical equivalent--see below), and Credit Hours. If you repeated the same course, use the highest grade.

**Step 3:** Multiply the Number Grade by the Credit Hours to obtain Quality Points.

**Step 4:** Compute the total Credit Hours and total Quality Points. Then divide the total Quality Points by the total Credit Hours. Example: 104.16 Q pts divided by 40 credits = 2.60 g.p.a.

**Step 5:** Your major department chair must approve your course selections for the major. Upon approval, your grade point average in the major would be \_\_\_\_\_.
