

# Minor Map: Sociology

Effective Fall 2015

The Sociology Program at Rollins College consists of a rigorous curriculum designed to promote sociological literacy and engaged citizenship; to enhance students' awareness and understanding of twenty-first century social problems, including the enduring presence of class, race and gender inequalities; and to cultivate among students the theoretical and methodological skills to investigate the connections between individuals and society, and the possibilities for social change.

**Six (6) courses are required, four (4) of which must be taken at Rollins.**
