Xprss Nap Dispensers

Xprss Nap Dispensers save energy and waste. The napkins are made of 100% recycled paper and the dispenser will encourage customers to take (and waste) fewer napkins. Energy is saved because less power is

Reusable Cup Discount

The environment and your pocketbook win! Bring your own reusable cup to purchase coffee or a fountain soda on campus and receive a discount at every location, every time.

APEX Dishwashing System

APEX combines technology and products designed to save water and energy, minimize the impact of products on the environment, and has a built-in method of measuring results. The APEX management approach uses a tablet PC and wireless technology to communicate with the system's controller to download, process and analyze data to establish each foodservice operation's "rack-to-guest ratio." By monitoring and improving this ratio, the system helps reduce the amount of water and energy used at each facility, and improve total operational efficiency..

Sustainable

Reusable Dishware

We offer china dishes in our dining locations. This reduces waste associated with using disposable containers. Dining in? Be sure to use china. We also use china at our catered functions on site.

Cage-Free Eggs

“Sodexo’s move on procurement of shell and liquid eggs from more humane sources reflects a strong commitment to hen welfare. We are grateful that the company has exhibited such leadership in improving the treatment of farm animals within its supply chain.”

- Josh Balk, director of corporate policy for the Humane Society of the United States

Green Cleaning “Green Seal”

92% of the chemicals Sodexo uses are “Green Seal” certified, concentrated or sustainable.

Local Suppliers

We work closely with local produce distributors to maximize the fruits and vegetables purchased from local farms. We also purchase from local dairies, and participate in farm to school initiatives

Sustainable

Tote Tree

We take the conservation of our environment very seriously. Sodexo Campus Dining in partnership with Eco Rollins have placed a Tote Tree for reusable bags at the C-store. That way we all can contribute to minimize our carbon footprint.

Eco - Takeout

Dining services has gone "Green" with a reusable take-out program. Where a reusable eco friendly container can be purchased, utilized and be brought back to be washed .

Reduction of plastic water bottles on campus

As a combined effort with Eco Rollins, we have taken the initiative to reduce the consumption of plastic water and beverage bottles in campus. On the three of locations we only offer glass bottled beverages.
